NUCLEAR PHYSICS—(contd)

Nuclear reactions	1496	1777	1975	2219	2429	2725
Due to photons	1496	1778	1976	2220	2429	2726
Due to neutrinos	—	—	—	2220	—	—
Due to electrons	1497	1778	1976	2220	2430	2727
Due to muons	1497	1778	1977	2221	2430	2728
Due to nucleons	1497	1778	1977	2221	2430	2728
Due to protons	1497	1779	1977	—	2430	2728
Due to neutrons	1499	1782	1981	2222	2432	2731
Due to mesons and hyperons	1500	1784	1982	2224	2433	2733
Due to deuterons and tritons	1500	1784	1983	2224	2433	2733
Due to alpha-particles and He nuclei	1501	1786	1984	2225	2434	2735
Due to other particles and nuclei	1502	1787	1985	2225	2435	2736
Nuclear fission	1502	1787	1985	2225	2435	2737
Thermonuclear reactions. Nuclear fusion	1503	—	1987	2226	—	2739
Nuclear power studies	1503	1787	1987	2226	2436	2739
ATOMIC AND MOLECULAR PHYSICS	1507	1788	1992	2226	2440	2746
Mass spectrometers	1507	1789	1992	2227	—	—
Atoms	1508	1789	1992	2227	2440	2746
Isotopes	—	1791	—	2233	2444	2754
Mesic and muonic atoms	1512	1791	1997	—	2444	—
Molecules	1512	—	—	2233	—	2756
Structure. Internal mechanics. Spectra	1512	1792	1997	2233	2445	2756
Magnetic resonances	1520	1797	2005	2240	2448	2772
Dissociation. Free radicals	1521	1797	2006	2240	2448	2774
Intermolecular mechanics	1522	1798	2007	2240	2449	2775
Macromolecules. Polymers	1523	1798	2008	2241	2450	2777
Mesic and muonic molecules	—	—	2008	—	—	—
Electric discharges	1524	1799	2008	2241	2450	2779
Ionization	1527	1800	2009	2244	2452	2784
Plasma	1530	1802	2010	2246	2454	2788
Plasma confinement	1534	1804	2013	2250	2459	2796
Plasma oscillations and stability	1534	1805	2013	2251	2460	2797
Plasma devices	1537	1806	2014	2253	2462	2801
FLUIDS	1538	1806	2015	2254	2463	2803
Mechanics of gases	1539	1808	2016	2255	2464	2808
Gaseous state	1540	1809	2016	2256	2465	2811
Viscosity. Diffusion	1542	1810	2018	2258	2467	2814
Vacuum physics	1543	1810	2019	2258	2467	2815
Mechanics of liquids	1543	1810	2019	2258	2468	2815
Liquid state	1545	—	—	—	—	2818
Theory and structure of liquids. Solutions	1545	1812	2020	2259	2469	2819
Viscosity. Surface tension. Diffusion	1549	1813	2021	2260	2470	2821
Thermal properties of liquids	1551	1814	2023	2262	2470	2824
Acoustical properties of liquids	1552	1815	2023	2262	2471	2825
Optical properties of liquids	1552	1815	2024	2263	2471	2825
Electrical and magnetic properties of liquids	1555	1817	2025	2263	2472	2829
Dispersions. Colloids	1556	1818	2026	2266	2473	2832
CHANGE OF STATE	1557	1819	2027	2266	2473	2833
SOLID-STATE PHYSICS	1560	1821	2029	2267	2475	2837
Structure of solids. Alloys	1563	1823	2030	2269	2477	2844
Solid-state phase transformations	1564	1824	2031	2270	2478	2848
Surfaces	1567	1827	2032	2273	2481	2854
Films	1568	1828	2032	2274	2482	2855
Adsorption	1569	1829	2033	2275	2484	2858
Non-crystalline state	1571	1829	2034	—	2484	2860
Crystallography	1572	1830	2035	2276	2485	2861
Microstructure of solids	1576	1833	2037	2278	2487	2879
Crystal lattice structures	1578	1834	2038	2280	2490	2884
Lattice mechanics	1582	1837	2040	2281	2495	2898
Acoustical properties of solids	1585	1839	2041	2284	2497	2901
Thermal properties of solids	1587	1840	2043	2285	2499	2904
Diffusion in solids	1591	1843	2044	2288	2501	2909
Defect properties of solids	1593	1846	2045	2290	2504	2914
Colour centres	1598	1851	2050	2294	2510	2923
Radiation effects in solids	1598	1852	—	2295	2511	2925
Mechanical properties of solids	1599	1853	2052	2296	2513	2929

LIST OF JOURNALS AND REPORTS

The periodicals and serials listed below are all scanned for material of value for reviewing in the Science Abstracts Publications (comprising Physics Abstracts, Electrical & Electronics Abstracts, Control Abstracts, Current Papers in Physics, Current Papers and Current Papers on Control). The list includes those periodicals from which all articles in each issue are invariably abstracted, but they are also listed separately at the end ("Journals abstracted completely").

Some of the abstracts are reproduced, with permission, from other abstracting periodicals (as indicated at the foot of the abstracts), and in these cases the name of the abstracting organization may be given in place of the address of the original journal, where it has not been possible to determine the latter. Further enquiry should be made from the abstracting organization named; addresses are given at the end of the list ("Abstracting journals and reports").

Abstracts are published only of articles which are believed to be in general circulation, and which should therefore be available in national and scientific libraries, or from the publishers, whose addresses are given in this list. Application should not be made to "Science Abstracts" for copies of the full text of any of the articles abstracted, or for translations.

For the benefit of those who are unfamiliar with the form and purpose of such abstracting periodicals as "Science Abstracts", it may be said that each abstract is a summary of an article (or book) published elsewhere, the title of the article (or its English translation) being given at the beginning of the abstract. The "reference", printed immediately after the title and author, gives the name and date of the journal where the article was printed and the appropriate pages. In general, title, author and reference are usually required for the unambiguous identification of an article (e.g. in a bibliography), though the reference alone is sufficient for the location of the article. For books, the town of publication, the name of the publisher, and the year are given in the reference.

The form of the "reference", giving volume number, issue number, pages and date, will, it is hoped, be self-explanatory. It should be emphasized that the date given refers, in nearly every case, to the "issue" or "number" containing the article abstracted; in some cases, particularly when papers are issued separately, the "volume" when bound may bear a different date. The date given is that recorded on the issue, not the actual date of publication or receipt, unless so stated. When the volume carries no number, the year is given in its place.

If no indication of language is given in the abstract, the article may be assumed to be in English. This does not necessarily hold, however, for abstracts reproduced from other abstracting periodicals giving no indication of language.

JOURNALS ABSTRACTED COMPLETELY

The following lists give the names of those journals all of whose scientific and technical articles were abstracted completely during 1967 by either "Physics Abstracts", "Electrical & Electronics Abstracts or "Control Abstracts". A certain amount of discretion must, however, be allowed in the interpretation of the phrase "completely abstracted" as nearly all journals occasionally publish items of a non-scientific, transient or trivial character which are, of course, not abstracted.

Some of these journals publish a small proportion of significant articles on subjects nor normally considered to come within the fields of interest of "Science Abstracts" and these articles are still recorded and indexed, although in some cases an abstract may not be included. The number of such articles is too small to weigh against the inclusion of the corresponding journals in the lists, particularly those of national scientific and engineering societies. The absence of a title from these lists does not exclude the possibility that the contents of the journal have also been abstracted completely in the sense indicated above, and in such cases the journal title will be added to the list in due course.

AUTHOR INDEX - PART II

For the sake of simplicity and uniformity, all names beginning with articles or prepositions are listed as if written as single words, regardless of nationality (e.g. Van Vleck is listed as if written Vanvleck). Cross-references are included in appropriate places. Compound names are generally listed under the last component, unless hyphenated; exceptions to this rule are appropriately cross-referenced.

All names are reproduced in the abstracts and the index with the same spelling as in the original articles; in the case of articles printed in Cyrillic characters, a letter-by-letter transliteration is given. Russian authors' names may appear in Latin-alphabet publications in various forms, due to the use of different transliteration schemes; these names are reproduced as printed in the articles abstracted.

A shortened form of the title of the article is used instead of the complete title; this shortened form will, in most cases, be sufficient to differentiate a particular article from any other that the author may have written.

When an article has several authors:
i) each author's name appears separately, and all the names do NOT appear together in an entry;
ii) the first author's name is followed by a '+' sign before the abstract number to indicate that there are further authors, whereas for the co-authors, a '+' sign precedes their names, to indicate that they are not the first author,

The Abstract Number given with each entry incorporates the final digit of the year of publication in "Science Abstracts"; thus, "7=1234" in this index means 'Abstract 1234 in the 1967 volume of this Section of "Science Abstracts"'.
